

A. Translation

time limit per test: 1 second

memory limit per test: 256 megabytes

The translation from the Berland language into the Birland language is not an easy task. Those languages are very similar: a Berlandish word differs from a Birlandish word with the same meaning a little: it is spelled (and pronounced) reversely. For example, a Berlandish word `code` corresponds to a Birlandish word `edoc`. However, making a mistake during the "translation" is easy. Vasya translated the word s from Berlandish into Birlandish as t . Help him: find out if he translated the word correctly.

Input

The first line contains word s , the second line contains word t . The words consist of lowercase Latin letters. The input data do not contain unnecessary spaces. The words are not empty and their lengths do not exceed 100 symbols.

Output

If the word t is a word s , written reversely, print YES, otherwise print NO.

Examples

input	Copy
code edoc	
output	Copy
YES	

input	Copy
abb aba	
output	Copy
NO	

input	Copy
code code	
output	Copy
NO	

Codeforces Beta Round 40 (Div. 2).

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
