Many countries possess nuclear weapons, and these weapons are usually activated by buttons. You are given two integers a and b where a denotes the size of the button President Trump has and b denotes the size of the button that eternal leader Kim Jong-Un has.

Input

The input consists of two lines. The first line has a single integer a , the size of Trump's button. The second line has a single integer b , the size of Kim's button.

Output

If Trump has a larger button, print MAGA!. If Kim Jong-Un has a larger button print FAKE NEWS!. If the buttons are equally large print WORLD WAR 3!. Note that MAGA is an acronym for "Make America Great Again."

Scoring

Group	Points	Constraints
1	100	$0 \leq a, b \leq 10^9$
