

A. George and Accommodation

time limit per test: 1 second

memory limit per test: 256 megabytes

George has recently entered the BSUCP (Berland State University for Cool Programmers). George has a friend Alex who has also entered the university. Now they are moving into a dormitory.

George and Alex want to live in the same room. The dormitory has n rooms in total. At the moment the i -th room has p_i people living in it and the room can accommodate q_i people in total ($p_i \leq q_i$). Your task is to count how many rooms has free place for both George and Alex.

Input

The first line contains a single integer n ($1 \leq n \leq 100$) — the number of rooms.

The i -th of the next n lines contains two integers p_i and q_i ($0 \leq p_i \leq q_i \leq 100$) — the number of people who already live in the i -th room and the room's capacity.

Output

Print a single integer — the number of rooms where George and Alex can move in.

Examples

input	Copy
<pre>3 1 1 2 2 3 3</pre>	
output	Copy
<pre>0</pre>	

input	Copy
<pre>3 1 10 0 10 10 10</pre>	
output	Copy
<pre>2</pre>	

Codeforces Round 267 (Div. 2).

Finished

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
